ICSECM 2019-Ranjith Dissanayake 2020-09-18 This book highlights current research and developments in the area of Structural Engineering and Construction Management, which are important disciplines in Civil Engineering. It covers the following topics and categories of Structural Engineering. The main chapters/sections of the proceedings are Structural and Solid Mechanics, Construction Materials, Systems and Management, Loading Effects, Construction Safety, Architecture & Architectural Engineering, Coastal Engineering, Foundation engineering, Materials, Sustainability. The content of this book provides necessary knowledge for construction management practices, new tools and technologies on local and global levels in civil engineering which can mitigate the negative effects of built environment.

Urban and Regional Planning in India-S. K. Kulshrestha 2012-09-11 The scope of professional practice in planning has now become very vast-in addition to traditional land-use planning at urban, regional and national levels, it includes development management; real-estate development; advice, arbitration and legal services; education and training; and research. In this book, Dr Kulshrestha provides a detailed study of this profession in India, covering such aspects as ethics; scope of work in public, private and joint sectors; procedures for procuring consultancy, engaging contractors, and entering into agreements; calculation of fee charged for rendering the service; establishing offices in India and abroad; and managing personnel. The book presents a comprehensive study to the subject of urban and regional planning in India, detailing the changing role of spatial planners and their professional requirements, and in that sense is a complete guide for those working in the spatial-planning field or aspiring to get into it.

Infrastructure Development and Construction Management-J. C. Edison 2020-10-15 This is a comprehensive book on infrastructure development and construction management. It is written keeping in mind the curricula of construction management programmes in India and abroad. It covers infrastructure development, the construction industry in India, financial analysis of the real estate industry in India, economic analysis of projects, tendering and bidding, contracts and contract management, FIDIC conditions of contract, construction disputes and claims, arbitration, conciliation and dispute resolution, international construction project exports and identifying, analysing and managing construction project risk. Thus, this book covers most of the construction management activities that are carried out at different stages of a construction project. This is an essential book for students of construction management, construction professionals, academicians and researchers.

TERI Energy & Environment Data Diary and Yearbook (TEDDY) 2015/16- 2016-03-15 TERI Energy & Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by The Energy and Resources Institute (TERI) since 1986. It is the only comprehensive energy and environment yearbook in India which provides updated information on the energy supply sectors (coal and lignite, petroleum and natural gas, power, and renewable energy sources), energy demand sectors (agriculture, industry, transport, residential, and commercial sectors), and environment (local and global). The publication also provides a review of the government policies that have implications for these sectors of the Indian economy. Each edition of TEDDY contains India's commercial energy balances for the last four years that provide comprehensive information on energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable ready

reckoner for researchers, scholars, and organizations working on energy and related sectors. After the introductory chapters, for the ease of readers, TEDDY has been divided into sections on energy supply, energy demand, and local and global environment. The thirtieth edition of the publication, TEDDY 2015/16, comes with several interesting features. The Green Focus at the end of each chapter highlights sustainable initiatives and successful practices, which are of current interest in the sectors discussed under the sections on energy supply, energy demand, and local and global environment. The publication also features a section that discusses sustainable development goals and air pollution and health. Interactive graphs, figures, maps, and tables have been used throughout the chapters to explain facts, which make the book an interesting read. In addition, detailed tables at the end of each chapter represent statistical data on each of the above-mentioned sectors. The publication is accompanied by a complimentary CD containing full text. The publication has more than 15,000 readers across the globe and is often cited in international peer reviewed journals and policy documents. Key Features: · Exhaustive compilation of data from energy supply and demand sectors · Recent data along with data for the past years presented in the form of structured and easy to understand tables · Recent advances made in the energy sectors are covered in the book · Self-explanatory figures and graphs showing the latest trends in various sectors are also part of chapters · The □Green focus□ section in every chapter highlights a topical issue · The book comes with a complimentary CD that contains all the chapters and additional tables Contents: Energy and environment: an overview, Commercial energy balance tables and conversion factors □ Energy supply: Coal and lignite, Petroleum and natural gas, Power, Renewable energy sources and technologies □ Energy demand: Agriculture, Industry, Transport, Household energy □ Local and global environment: Environment, Climate change □ Energy and environment goals: Sustainable development goals and implications for India, Air pollution and health

FIDIC - A Guide for Practitioners-Axel-Volkmar Jaeger 2009-11-11 In 1999, a suite of three new conditions of contract was published by FIDIC, following the basic structure and wording harmonised and updated around the previous FIDIC Design-Build and Turnkey Contract (the 1992 "Orange Book"). These conditions, known as the "FIDIC rainbow, were the Conditions of Contract for: 1 Construction, the so-called Red Book, for works designed by the Employer 1 Plant and Design-Build, the so-called Yellow Book, for works designed by the Contractor 1 EPC/Turnkey Projects, the so-called Silver Book, for works designed by the Contractor The first is intended for construction works where the Employer is responsible for the design, as for per the previous so-called Red Book 4th Edition (1987), with an important role for the Engineer. The other two conditions of contract are intended for situations when the Contractor is responsible for the design. The Plant and Design-Build Contract has the traditional Engineer while the EPC/Turnkey Contract has a two-party arrangement, generally with an Employer's Representative as one of the parties.

Handbook on Seismic Retrofit of Buildings-Amarnath Chakrabarti 2008
The Handbook on Seismic Retrofit of Buildings is a compiled source of technical information for engineers and professionals in the buildings industry, decision making officials and students. The Handbook is divided into 17 chapters, covering - basic concepts of earthquakes, seismic design and retrofit of buildings, seismic vulnerability assessment, retrofit strategies for different types of buildings, geotechnical and foundation aspects, advanced applications, quality assurance and case studies.

Procurement of Works- 2000 These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

Public Procurement of Energy Efficiency Services-Jas Singh 2009-12-17
The current universal concerns about global energy security, competitiveness, and environmental protection make energy efficiency more important than ever. However, realizing large-scale savings has proven a significant challenge due to many barriers. 'Public Procurement of Energy Efficiency Services' looks at a largely untapped energy efficiency market the public sector. While the efficiency potential in this sector is substantial, the implementation of energy savings programs has been complicated by a number of factors, such as insufficient incentives to lower energy costs, rigid budgeting and procurement procedures, and limited access to financing. The book looks at energy savings performance contracts (ESPCs) as a means of overcoming some of these barriers. Because public facilities can outsource the full project cycle to a commercial service provider, ESPCs can enable public agencies to solicit technical solutions, mobilize commercial financing, and assign performance risk to third parties, allowing the agency to pay from a project's actual energy savings. The recommendations in this book stem from case studies that identified approaches, models, and specific solutions to ESPC procurement, including budgeting, energy audits, and bid evaluation. Such an approach also offers enormous potential to bundle, finance, and implement energy efficiency projects on a larger scale in the public sector, which can yield further economies of scale. ESPCs can also serve as an attractive element for fiscal stimulus packages and efforts by governments to 'green' their

infrastructure, which can create local jobs, reduce future operating costs, and mitigate their carbon footprint. Lower energy bills, in turn, help to create fiscal space in future years to meet other critical investment priorities. Bundled public sector energy efficiency projects can help stimulate local markets for energy efficiency goods and services and 'lead by example', demonstrating good practices and providing models to the private sector.

Fire Safety In Buildings-V. K. Jain 2007 Ever-Increasing Population And Demand Of Built-Up Spaces Have Constrained Our Society To Go For Compact And Multi-Storeyed Building Premises. In Metropolitan Cities, There Was No Choice For Town Planners But To Go For Vertical Expansion Rather Than Horizontal. The Net Result Was Construction Of Thousands Of Multi-Storeyed Complexes Which Needed Proper Fire Security Arrangements. Legislation Exists At Different Levels Incorporating Different Type Of Restrictions To The Designers And Occupiers Of The Building. A Vast Amount Of Guidelines Exists But Not Known To Everybody Engaged In The Field.This Book Is Designed To Cover This Gap And Will Be A Right Choice In This Direction. It Comprehensively Deals Not Only With The Fundamentals Of Fire Engineering Appends Different Building Bye-Laws And Relevant Abstracts From Bis And National Building Codes, Nfpa, Lpa, Tac, Etc. But Reviews Structural Safety, And Provides Sufficient Multi Disciplinary Guidelines For Selecting Proper Gadgets For Complete Fire Safety Of Building Complexes. A Complete Treatise On Fire Security Of Its Own Kind For The First Time In India.

Blood and Water-David Gilmartin 2020-04-14 The Indus basin was once an arid pastoral watershed, but by the second half of the twentieth century, it had become one of the world's most heavily irrigated and populated river basins. Launched under British colonial rule in the nineteenth century, this irrigation project spurred political, social, and environmental transformations that continued after the 1947 creation of the new states of India and Pakistan. In this first large-scale environmental history of the region, David Gilmartin focuses on the changes that occurred in the basin as a result of the implementation of the world's largest modern integrated irrigation system. This masterful work of scholarship explores how environmental transformation is tied to the creation of communities and nations, focusing on the intersection of politics, statecraft, and the environment.

Medicinal Plants and Environmental Challenges-Mansour Ghorbanpour 2017-10-31 This book sheds new light on the role of various environmental factors in regulating the metabolic adaptation of medicinal and aromatic plants. Many of the chapters present cutting-edge findings on the contamination of medicinal plants through horizontal transfer, as well as nanomaterials and the biosynthesis of pharmacologically active compounds. In addition, the book highlights the impacts of environmental factors (e.g., high and low temperature, climate change, global warming, UV irradiation, intense sunlight and shade, ozone, carbon dioxide, drought, salinity, nutrient deficiency, agrochemicals, waste, heavy metals, nanomaterials, weeds, pests and pathogen infections) on medicinal and aromatic plants, emphasizing secondary metabolisms. In recent years, interest has grown in the use of bioactive compounds from natural sources. Medicinal and aromatic plants constitute an important part of the natural environment and agro-ecosystems, and contain a wealth of chemical compounds known as secondary metabolites and including alkaloids, glycosides, essential oils and other miscellaneous active substances. These metabolites help plants cope with environmental and/or external stimuli in a rapid, reversible and ecologically meaningful manner. Additionally, environmental factors play a crucial role in regulating the metabolic yield of these biologically active molecules. Understanding how medicinal plants respond to environmental perturbations and climate change could open new frontiers in plant production and in agriculture, where successive innovation is urgently

needed due to the looming challenges in connection with global food security and climate change. Readers will discover a range of revealing perspectives and the latest research on this vital topic.

Reading in the Digital Age: Young Children's Experiences with E-books-Ji Eun Kim 2019-07-23 This edited book focuses on affordances and limitations of e-books for early language and literacy, features and design of e-books for early language and literacy, print versus e-books in early language and literacy development, and uses of and guidelines for how to use e-books in school and home literacy practices. Uniquely, this book includes critical reviews of diverse aspects of e-books (e.g., features) and e-book uses (e.g., independent reading) for early literacy as well as multiple examinations of e-books in home and school contexts using a variety of research methods and/or theoretical frames. The studies of children's engagement with diverse types of e-books in different social contexts provide readers with a contemporary and comprehensive understanding of this topic. Research has demonstrated that ever-increasing numbers of children use digital devices as part of their daily routine. Yet, despite children's frequent use of e-books from an early age, there is a limited understanding regarding how those e-books are actually being used at home and school. As more e-books become available, it is important to examine the educational benefits and limitations of different types of e-books for children. So far, studies on the topic have presented inconsistent findings regarding potential benefits and limitations of e-books for early literacy activities (e.g., independent reading, shared reading). The studies in this book aim to fill such gaps in the literature.

Colonial Modernities-Peter Scriver 2007-03-12 A carefully crafted selection of essays from international experts, this book explores the effect of colonial architecture and space on the societies involved - both the colonizer and the colonized. Focusing on British India and Ceylon, the essays explore the discursive tensions between the various different scales and dimensions of such 'empire-building' practices and constructions. Providing a thorough exploration of these tensions, Colonial Modernities challenges the traditional literature on the architecture and infrastructure of the former European empires, not least that of the British Indian 'Raj'. Illustrated with seventy-five halftone images, it is a fascinating and thoroughly grounded exposition of the societal impact of colonial architecture and engineering.

Disability Studies in India-Nilika Mehrotra 2020-04-02 This book examines the state of art in disability studies, focusing on the Indian context, as well as the broader South Asian situation. It presents interdisciplinary perspectives on the basic idea, evolution, practices and challenges of researching and teaching disability studies at various higher education institutions and in other civil society spaces. The chapters address a range of related themes, including activism, development policies, research, pedagogy, spatial and social access, caste and gender representations and rights-based discourses. Given the scope of its coverage, the book is of interest to scholars and students in area of humanities, education, law, sociology and social work, political science development and disability studies.

Tall Building Foundation Design-Harry G. Poulos 2017-07-20 This book provides a comprehensive guide to the design of foundations for tall buildings. After a general review of the characteristics of tall buildings, various foundation options are discussed followed by the general principles of foundation design as applied to tall buildings. Considerable attention is paid to the methods of assessment of the geotechnical design parameters, as this is a critical component of the design process. A detailed treatment is then given to foundation design for various conditions, including ultimate stability, serviceability, ground movements, dynamic loadings and seismic loadings. Basement wall design is also addressed. The last part of the book deals with pile load testing and foundation performance measurement, and finally, the description of a number of case histories. A feature of the book is the emphasis it places on the various stages of foundation design: preliminary, detailed and final, and the presentation of a number of relevant methods of design associated with each stage.
